Assignment – 05

# Job Application Form (Advanced) — Advanced Fields Use Case

*Extending the Job Application Form with All Seventeen Advanced Fields in Zoho Creator*

*A Case Study of the Recruitment & Job Application Management System (Advanced Edition)*

**Alwin Abishek.S.T**
Register No.: 2116241501017
Department of Computer Science and Engineering
Rajalakshmi Engineering College

## 1. Objective

To extend the existing “Job Application Form” application in Zoho Creator by incorporating all seventeen Advanced Fields available in the Form Builder, so that the form moves beyond basic data capture and demonstrates automation, computed values, file/media handling, and structured lookups within a real HR-recruitment use case.

## 2. Problem Statement

The basic Job Application Form (built earlier using the thirteen Basic Fields) captures a candidate’s identity, contact details, and job preference, but it cannot handle several real-world requirements of a growing company’s recruitment process: verifying the referring employee against the official staff directory, recording a candidate’s full employment history in one submission, computing the expected CTC automatically, issuing a unique scannable application reference, or accepting supporting media such as a resume file, a video resume, or a signed declaration.

Extend the Job_Application_Form in Zoho Creator so that, in addition to the existing basic fields, it uses every Advanced Field type provided by Zoho Creator’s Form Builder to support employment history capture, compensation computation, referral verification, and automated application-ID/QR generation for tracking through the hiring pipeline.

## 3. Scope of the Use Case

- Application Name: Recruitment & Job Application Management (Advanced Edition)
- Form Name: Job_Application_Form (extended with Advanced Fields)
- Primary Users: External job candidates / HR Recruitment team
- Report View: Candidate_Application_Report (extended with computed CTC, application ID, and QR code columns)
- Objective of the Extension: Enable HR to verify employee referrals automatically, capture full employment history in one submission, compute expected compensation, and issue scannable digital application references

## 4. Advanced Fields Used and Their Mapping

The table below maps every Advanced Field from the Zoho Creator Form Builder palette to its role in the extended Job Application Form.

| Advanced Field | Form Field Name | Purpose | Sample Value / Behaviour |
|---|---|---|---|
| **Decision Box** | Willing_To_Relocate | Captures a quick Yes/No decision on relocation willingness | Yes / No toggle |
| **Rich Text** | Company_Culture_Display | Displays formatted company culture and benefits information | "We offer hybrid work, learning stipends, and a 5-day work week." |
| **URL** | Portfolio_GitHub_URL | Captures a link to the candidate's GitHub profile or portfolio | https://github.com/arjunkumar-dev |
| **Image** | Candidate_Photo | Captures a passport-size photo for HR system and ID badge | candidate_photo.jpg |
| **Percent** | Expected_Salary_Hike_Percent | Captures the expected salary hike percentage | 20% |
| **Currency** | Current_Annual_CTC | Captures the candidate's current annual CTC | ₹6,50,000.00 |
| **Decimal** | Academic_CGPA | Captures the candidate's academic CGPA | 8.20 |
| **Date-Time** | Application_Submitted_On | Automatically records date and time of submission | 24-Jul-2026 12:10 |
| **SubForm** | Previous_Employment_History | Captures repeating rows of company, designation, duration | Row 1: TCS – SE – 2 yrs; Row 2: Infosys – Sr. Engineer – 1 yr |
| **Lookup** | Referral_Employee_Lookup | Looks up and auto-fills referring employee from Employees table | Suresh Raghavan – Engineering Dept. |
| **Signature** | Candidate_Digital_Signature | Captures candidate's digital signature declaration | Signed (drawn signature captured) |
| **File Upload** | Resume_Upload | Allows upload of resume/CV document | arjun_kumar_resume.pdf |
| **Audio** | Self_Introduction_Audio | Allows optional short audio self-introduction | self_intro.mp3 (0:40) |
| **Video** | Video_Resume | Allows upload of a short video resume | video_resume.mp4 (1:00) |
| **Auto Number** | Application_ID | Auto-generates a unique, sequential application reference number | HR-APP-2026-000926 |
| **Formula** | Expected_Annual_CTC | Computes expected compensation from current CTC and hike % | = Current_Annual_CTC + (Current_Annual_CTC × Expected_Salary_Hike_Percent) |

| Advanced Field | Form Field Name | Purpose | Sample Value / Behaviour |
|---|---|---|---|
| **QR/Barcode** | Candidate_Tracking_QR_Code | Auto-generates a scannable QR code encoding the Application ID | QR image encoding HR-APP-2026-000926 |

## 5. Extended Form Layout (Section-wise)

The sections below are added to the existing Personal, Contact, and Job & Experience Details sections of the basic Job Application Form.

### Section E — Academic & Referral Verification

- Referral Employee Lookup (Lookup field, auto-fills from master Employees table)
- Candidate Photo (Image field)
- Resume Upload (File Upload field)
- Academic CGPA (Decimal field)

### Section F — Employment History & Media Details

- Previous Employment History (SubForm field, repeating rows)
- Portfolio/GitHub URL (URL field)
- Video Resume (Video field, optional)
- Self Introduction Audio (Audio field, optional)

### Section G — Compensation & Relocation

- Willing to Relocate (Decision Box)
- Current Annual CTC (Currency field)
- Expected Salary Hike Percent (Percent field)
- Expected Annual CTC (Formula field, read-only, auto-computed)

### Section H — Declaration & System-Generated Values

- Company Culture Display (Rich Text field, read-only reference block)
- Candidate Digital Signature (Signature field)
- Application Submitted On (Date-Time field, auto-captured)
- Application ID (Auto Number field, system-generated)
- Candidate Tracking QR Code (QR/Barcode field, system-generated from Application ID)

## 6. Validation & Configuration Rules

- Lookup field (Referral Employee Lookup): connected to a master Employees form; HR staff type-ahead search and select rather than typing free text.
- SubForm (Previous Employment History): configured to allow a minimum of 0 and a maximum of 6 rows per candidate.
- File Upload (Resume Upload): restrict accepted formats to PDF and DOCX, with a maximum size of 5 MB.
- Image (Candidate Photo): restrict accepted formats to JPG and PNG only, with a maximum size of 2 MB.
- Video (Video Resume): restrict maximum duration to 90 seconds and maximum size of 50 MB.
- Percent (Expected Salary Hike Percent): restrict value range from 0 to 100.

- Currency (Current Annual CTC): restrict to non-negative values only, formatted in INR (₹).
- Formula (Expected Annual CTC): set as a read-only field, recalculated automatically whenever Current Annual CTC or Expected Salary Hike Percent changes.
- Auto Number (Application ID): configured with prefix “HR-APP-”, the current year, and a 6-digit auto-incrementing sequence.
- QR/Barcode (Candidate Tracking QR Code): configured to auto-generate immediately after the Application ID is assigned on submission.
- Signature (Candidate Digital Signature) and Decision Box (Willing to Relocate) are mandatory fields; the form cannot be submitted without them.

## 7. Workflow Summary

- Step 1: Candidate completes the existing basic-field sections (personal, contact, and job/experience details).
- Step 2: Candidate selects the Referral Employee (if any) using the Lookup field, which auto-fills the employee's department.
- Step 3: Candidate adds each previous employer's details as a row in the Previous Employment History SubForm.
- Step 4: Candidate uploads their photo, resume, and optionally a video resume and a self-introduction audio clip.
- Step 5: Candidate indicates their willingness to relocate, and the Current Annual CTC, Expected Salary Hike, and computed Expected Annual CTC are displayed.
- Step 6: Candidate reviews the Company Culture rich text block and provides their Digital Signature to confirm the accuracy declaration.
- Step 7: On Submit, Zoho Creator auto-generates the Application ID, timestamps the Application Submitted On field, and generates the Candidate Tracking QR Code.
- Step 8: HR reviews the Candidate_Application_Report, verifies the resume and referral, evaluates the Expected Annual CTC against the budget, and uses the QR code to track the candidate through each interview round.

## 8. Expected Learning Outcomes

- Understand the purpose and correct use case for each Advanced Field in Zoho Creator.
- Learn how to configure Lookup fields for cross-form data verification.
- Practice using SubForms to capture repeating employment-history data within a single submission.
- Understand how Formula and Auto Number fields automate calculations and unique identifiers.
- Learn how to configure file-based fields (Image, File Upload, Audio, Video, Signature) with format and size restrictions.
- Understand how QR/Barcode fields can be used for real-world candidate-tracking validation and process automation.

## 9. Deliverable for This Lab Exercise

Students must extend their existing Job_Application_Form in Zoho Creator to include all 17 Advanced Fields exactly as specified above, configure the listed validations and computed logic, and submit a screenshot-based lab record showing:

- (a) the extended form in Form Builder with all Advanced Fields
- (b) a live preview of the form including the SubForm and computed Expected Annual CTC
- (c) at least two sample submitted records showing the auto-generated Application ID and QR Code in the report view
- (d) a screenshot of the Referral Employee Lookup in action
